

71% of organisations categorise their cyber risk as moderately or highly dependent on external entities and vendors.

Have you been monitoring the cyber risk of your third-party vendors?

Do you have clear visibility on your public-facing assets and entities?

WHAT IS SRM?

A SaaS-based platform to continuously discover and monitor the risk of all your assets and vendors.

CYBER RISK QUANTIFIED

QUANTIFY CYBER RISK ON 6 KEY AREAS OF SECURITY

NETWORK SECURITY

Automatically detect anomalies & vulnerabilities in internet-facing network devices, servers and open ports.

APPLICATION SECURITY

Map and scan your web & mobile applications to find vulnerabilities & missing best practices.

DOMAIN HEALTH

Enumerate all public-facing domains & subdomains and check for dns misconfigurations, such as SPF, DKIM, DMARC, etc.

DATA BREACH

Scan thousands of hacker frequented channels in the surface & deep web for traces of user data leakage.

HACKER CHATTER

Monitor surface & deep web's chat groups, social media and hacker forums to detect attacks preemptively.

IP REPUTATION

Identify internal infected servers via gathering IP address intel from global threat intelligence & malware feeds.

Automatically and Continuously Identify, Map, Scan, Assess and Grade all your assets, vendors and acquisitions on the basis of their risk portfolio. All from the perspective of a hacker, but completely non-intrusive.

CONTINUOUS PERIMETER ASSESSMENT

Get visibility of all assets in your cyber perimeter from the eyes of the hacker. Continuously Discover, Monitor, Detect, Assess and Triage the anomalies that are a risk to you.

THIRD PARTY ASSESSMENT

All the money invested in securing your assets can be rendered useless due to a single high-risk vendor. Gain complete and instant visibility of the risk profile of all your present and prospect vendors.

CYBER INSURANCE

Cyber insurance underwriters and receivers can both utilise the SRM profile greatly by gaining detailed visibility of an organisation's true cyber risk profile. SRM helps the organisation to achieve a risk-free certificate which is trusted by cyber insurers worldwide.

GARTNER SAYS MORE THAN EIGHT IN TEN ORGANISATIONS DISCOVER THIRD PARTY RISKS AFTER DUE DILIGENCE PERIOD.

A SINGLE HIGH RISK VENDOR CAN TEAR DOWN A MILLION-DOLLAR SECURITY ARCHITECTURE.

QUANTIFY YOUR CYBER RISK WITH -

SPR

THE CXO SECURITY POSTURE REPORT: A management level report which provides a high-level overview of how your security posture stands in terms of the 7 key risk factors converged into a grade between A+ & E.

DTR

THE DETAILED TECHNICAL REPORT: A report that provides an in-depth breakdown & root cause analysis of the all vulnerabilities, misconfigurations, data leaks and compromised/blacklisted servers discovered among your public-facing assets along with patch recommendations.

CMD

CONTINUOUS MONITORING DASHBOARD: An interactive SaaS dashboard where you get on-demand report generation, continuous monitoring of your assets, vendors & acquisition along with one-click comparisons between vendors, applications and plotted graphs for their Cyber Risk Trends
